

Y9 assessment: Preparatory Task 2 (A03)

For the second assessment task, you will show your ability to record from primary sources, demonstrating an understanding of how to collect, select and edit interesting imagery.

Outcome: 20 interesting and varied photos. 2-3 final photos ready to draw from, selected from the initial shots.

STRICTLY NO GOOGLING ALLOWED! These must be your own original photos.

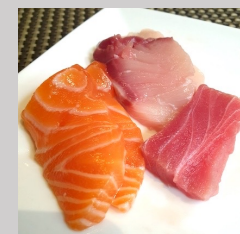

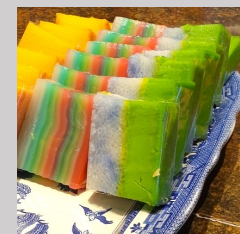

STEP ONE:

Take a series of **at least 20** photos exploring food items, meals, products and packaging *from your current project area*. The best of your photos will form the source material for your in-class assessment and having great starting points is essential!

Try exploring these places to find source material:

- Your own kitchen cupboards or fridge
- School Dining Room or Clocktower Café
- Supermarkets and wet markets
- Shopping malls
- Hawkers, cafes and restaurants

STEP TWO:

Edit all your photos – crop them if necessary, adjust the levels to improve contrast and colour. Resize them to about 30cm wide.

Select one of your very best photos to draw from in the assessment itself.

When you have finished, upload your work to **Firefly**.
